

Mushroom Cultivation bag *ST Bag*

Combination of sheet and filter is possible

Select the specified bag (thickness and size) filter (air flow and hole diameter) according to the environment

Hole diameter

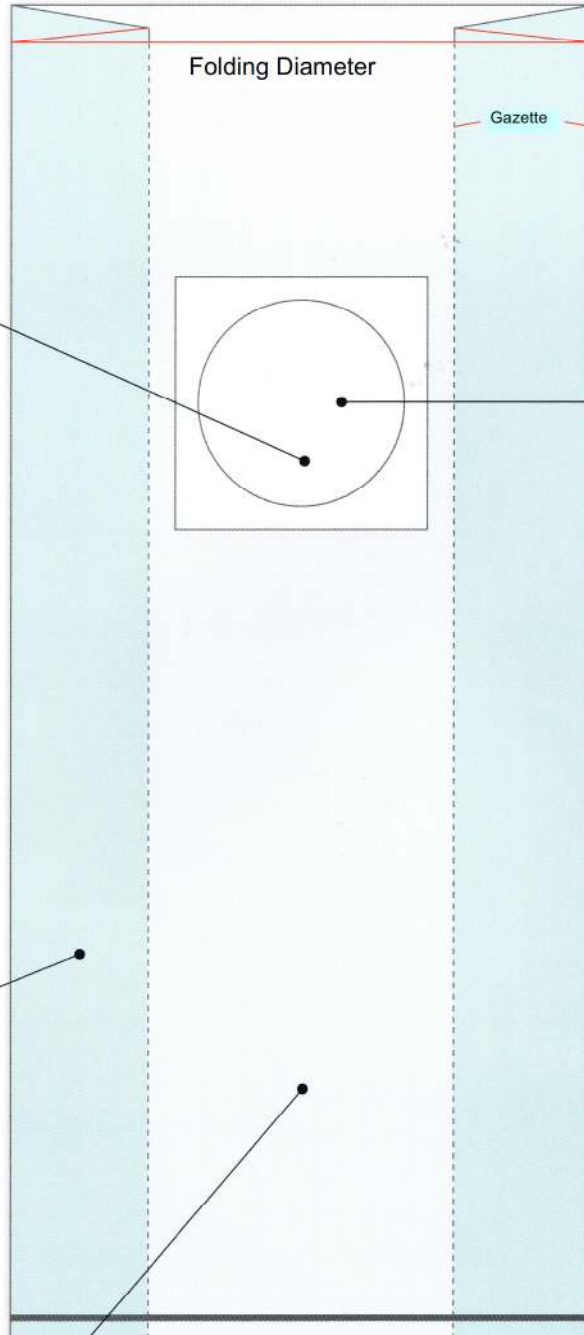

The size of the hole to be made in the film of the filter weld

- 25φ** Smallest filter
Diameter 25mm ■ One side filter
- 30φ** Filter for up to 1 kg
Diameter 30mm ■ One side, both sides attached filter
- 40φ** Basic filter
Diameter 40mm ■ One side, both sides attached filter
- 47φ** Tyvek filter only
Diameter 47mm ■ Only for Tyvek filter

Bag (Film) thickness

Material: High density polyethylene

- 60μ** (0.060mm) The film is thick and strong in small holes. Good for in a mobile environment
- 55μ** (0.055mm) Small hole does not occur easily
- 50μ** (0.050mm) General thickness appropriate for work
- 45μ** (0.045mm) Fit for cultivation with cap
- 40μ** (0.040mm) Easy to work bags attached cap

Filter

- ① Tyvek Filter
- ② SM Filter
- ③ XL Filter
- ④ MB Filter
- ⑤ TM Filter

Bag size

	Folding diameter	Gazette	length
2.5kg	325mm	62mm	450mm
2.0kg	230mm	50mm	420mm
1.3kg	195mm	46mm	385mm
1.1kg	190mm	45mm	360mm
